## 1.1 Compliance Scan Tools

Name	Comment
Tern	Open Source compliance for containers from VMware
Clair	Vulnerability Static Analysis for Containers

## 1.2 Common Docker Registry

Name	Comment
Docker hub	
Google container registry	
Self-maintained registry	JFrog, Nexus

## 1.3 Container Compliance Principles

Name	Comment
Choose container base images	No authroized or insecured base images
Download or install from external websites	Need to mirror the repo for apt-get, wget, etc
Install package with latest version	Insecure because the process is not reproducible
Build from source code	Good for the overall goverance
