1.1 Code Build

Name	Comment
Use container to build code, instead of build from laptop	docker build vs make/mvn/gradle
Reduce pulling dependencies or modules from internet/GitHub	Modify iptables rules in the build box

1.2 Pre-Merge Hook

Name	Comment
Code lint checks	
Unit test	

1.3 Component Tests

Name	Comment
Mockup services	
Test individually	
Test quickly	

1.4 Integration Tests

Name	Comment
------	---------
