1.1 Concepts

| Name | Summary |
|-----------------------|---------------------------------|
| Targets | alias of endpoint urls |
| Behavior | |
| bbl (bosh-bootloader) | GitHub: bosh-bootloader |
| Links | concepts, concoursetutorial.com |

https://raw.githubusercontent.com/dennyzhang/cheatsheet.dennyzhang.com/master/cheatsheet-concourse-A4/concourse-sample.png

1.2 Concourse fly

| Name | Summary |
|-----------------------------------|---|
| List all authenticated end points | fly targets link: fly targets |
| fly login | fly -t \$target login -c \$concourse_url -n \$team_name |
| Get pipeline definition | fly -t \$target get-pipeline -p \$job-name > job.yaml link: fly-getpipeline |
| Update pipeline | fly -t \$target set-pipeline -p \$pipeline_nameconfig pipeline.yml |
| Login to container | fly -t \$target hijack -u \$job_url |
| Destroy pipeline | fly -t \$target destroy-pipelinepipeline my-pipeline |

1.3 Modules

| Name | Summary |
|---------------|---------------------------------------|
| Git repo | git-resource example: example-git.yml |
| Google Bucket | gcs-resource |
| Docker image | docker-image-resource |

1.4 Concourse Resources

| Name | Summary |
|-----------------------|--|
| docker-image-resource | https://github.com/concourse/docker-image-resource |
| gcs-resource | https://github.com/frodenas/gcs-resource |
| git-resource | https://github.com/concourse/git-resource |

1.5 fly Online Usage

```
bash-3.2$ fly --help
error: Usage:
   fly [OPTIONS] <comman</pre>
```

fly [OPTIONS] <command>

Application Options:

| -t,target= | Concourse target name |
|---------------------|--|
| -v,version | Print the version of Fly and exit |
| verbose | Print API requests and responses |
| print-table-headers | Print table headers even for redirected output |

Help Options:

-h, --help Show this help message

Available commands:

abort-build Abort a build (aliases: ab)

List builds data (aliases: bs) builds Check a resource (aliases: cr) check-resource checklist Print a Checkfile of the given pipeline (aliases: cl) Print the active containers (aliases: cs) containers Destroy a pipeline (aliases: dp) destroy-pipeline Destroy a team and delete all of its data (aliases: dt) destroy-team Execute a one-off build using local bits (aliases: e) execute expose-pipeline Make a pipeline publicly viewable (aliases: ep) Format a pipeline config (aliases: fp) format-pipeline get-pipeline Get a pipeline's current configuration (aliases: gp) Print this help message help Hide a pipeline from the public (aliases: hp) hide-pipeline Execute a command in a container (aliases: intercept, i) hijack List the jobs in the pipelines (aliases: js) jobs Authenticate with the target (aliases: 1) login Release authentication with the target (aliases: o) logout Orders pipelines (aliases: op) order-pipelines Pause a job (aliases: pj) pause-job Pause a pipeline (aliases: pp) pause-pipeline Pause a resource (aliases: pr) pause-resource List the configured pipelines (aliases: ps) pipelines prune-worker Prune a stalled, landing, landed, or retiring worker (aliases: pw) Rename a pipeline (aliases: rp) rename-pipeline rename-team Rename a team (aliases: rt) Create or update a pipeline's configuration (aliases: sp) set-pipeline Create or modify a team to have the given credentials (aliases: st) set-team Login status status Download and replace the current fly from the target (aliases: s) sync targets List saved targets (aliases: ts) teams List the configured teams (aliases: t) trigger-job Start a job in a pipeline (aliases: tj) Unpause a job (aliases: uj) unpause-job unpause-pipeline Un-pause a pipeline (aliases: up) Unpause a resource (aliases: ur) unpause-resource validate-pipeline Validate a pipeline config (aliases: vp) List the active volumes (aliases: vs) volumes Stream a build's output (aliases: w) watch workers List the registered workers (aliases: ws)
